

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, November 14, 2018 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity**

Initial Attack Activity: Light (40) new fires  
 New large incidents: 1  
 Large fires contained: 2  
 Uncontained large fires:\*\* 3  
 Area Command teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 3  
 Type 2 IMTs committed: 1

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

In support of Super Typhoon Yuta, IMT 2 (Dalrymple) has mobilized to Saipan, Northern Mariana Islands.

**Northern California Area (PL 4)**

New fires: 21  
 New large incidents: 0  
 Uncontained large fires: 1  
 Type 1 IMTs committed: 1

**Camp**, Butte Unit, Cal Fire. Cal Fire IMT 1 (Derum). Three miles northeast of Concow, CA. Chaparral, timber and short grass. Moderate fire behavior with uphill runs, flanking and isolated torching. Several communities and energy, communications and railroad infrastructure threatened. Evacuations and road closures in effect.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Service Discussion:** The wind event across Southern California will continue today as the strong easterly flow continues to create Santa Ana winds that should persist into the evening before finally diminishing. East winds will also be possible along the western slopes of the Sierra; however, pressure gradients will be weak, so widespread critical conditions are not expected. Northerly pressure gradients will continue across the northern fringes of the state which will allow for breezy and dry conditions across the Sacramento Valley. Looking elsewhere, a strong low pressure system will sweep across the southeast bringing moderate to heavy showers while a strong northwesterly flow brings windy conditions to New England.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## Base All Actions On Current And Expected Fire Behavior

*Weather - Fire Behavior Category*

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
  - Post lookouts.
  - Check communications.
  - Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.

How would you judge the fire season? (Above normal, below, or average.)
